

ABDERRAHMAN LARAICH

Ruby on Rails & React Engineer

github.com/abdokin
laarichabdo@gmail.com
+212 614 292 371
Casablanca, Morocco (UTC+1)
Open to fully remote roles

Full-stack engineer specializing in Ruby on Rails, React, TypeScript, and PostgreSQL. Since July 2023, I have shipped healthcare, HR, and technical-assessment products at Mibtech, including multi-tenant workflows, sub-100 ms search, performance improvements, and deployment automation. I am based in Morocco and seeking a fully remote product-engineering role.

TECHNICAL EXPERTISE

Backend Frameworks:	Ruby on Rails, Symfony/PHP, Node.js/Express
Frontend:	React, TypeScript, Next.js, Hotwire/Turbo, Tailwind CSS, ViewComponent
Data:	PostgreSQL, MySQL, Redis, Typesense, MongoDB, SQLite, AWS S3
Architecture:	Multi-tenant SaaS, REST APIs, GraphQL, background jobs, real-time systems
Delivery:	Docker, Kamal, Dokku, GitHub Actions, Nginx, Linux, Sentry, Grafana, Prometheus
Quality:	RSpec, Jest, Cypress, PHPUnit, RuboCop, integration and end-to-end testing

PROFESSIONAL EXPERIENCE

Mibtech	Casablanca, Morocco
Full-Stack Developer	Jul 2023 - Present

Stack: Ruby on Rails, React, TypeScript, PostgreSQL, MySQL, Redis, Docker, Typesense

- Developed timezone management and payroll activity tracking with custom rules and configurable approval workflows for an HRIS platform.
- Implemented customizable exports across multiple modules, enabling flexible data extraction and reporting.
- Built Typesense-powered medical-record search with sub-100 ms query times, an 80% improvement over the previous implementation.
- Optimized database queries and added Redis caching, reducing analytics API response times by 60% for dashboards serving 1,000+ daily users.
- Contributed reusable React and TypeScript components to the @mibtech/ui shared component library.
- Configured Docker deployments with Kamal and Dokku, reducing deployment cycles from 30 to 5 minutes using a blue-green strategy.

TECHNICAL PROJECTS

Healthcare & Enterprise Systems

Al-Maktabah Digital Library Platform	Rails, PostgreSQL, Tailwind
--------------------------------------	-----------------------------

- Initiated an open-source, multi-tenant content platform with collaboration from multiple contributors.
- Implemented schema.org metadata, friendly URLs, and automated sitemaps, supporting a 40% increase in organic traffic.
- Built RBAC administration with Avo for content moderation and analytics.
- Integrated audio delivery, transcoding, and RSS feeds for podcast distribution.

github.com/tasfya/almaktabah | 3ilm.org

Hospital Information Systems - Consolidation Platform	React, Symfony/PHP, PostgreSQL, Redis
---	---------------------------------------

- Developed anomaly detection for inconsistencies across distributed hospital databases.
- Co-developed a master-data management system and centralized treasury workflows across hospital systems.
- Implemented unified IAM with SSO and granular RBAC for cross-hospital access.
- Built monitoring and automated backup capabilities with configurable retention and point-in-time recovery.

SaaS & Enterprise Applications

TestSkills - Technical Assessment SaaS

Rails, React, PostgreSQL

- Co-developed an assessment platform with role-specific technical, cognitive, and soft-skill tests.
- Built a configurable assessment builder with question types, time limits, and scoring rules.
- Implemented anti-cheating controls, candidate invitations, automated notifications, and progress tracking.
- Created analytics for instant reports, percentile rankings, skill-gap analysis, and candidate comparisons.
- Integrated job pipelines, team permissions, Stripe subscriptions, Google Calendar scheduling, and white-label features.

testskills.app

PERSONAL PROJECTS

Secure Password Manager

Rails 8, React, TypeScript, PostgreSQL

- Built organization-based secrets management with authentication, encrypted data, activity logs, access roles, and subscription flows.
- Added background jobs, rate limiting, audit history, CI, RSpec coverage, and Docker deployment configuration.

github.com/abdokin/password-manager

Automata Visualization Engine

Java, Maven, Graphviz

- Converted regular expressions to NFAs using Thompson's construction, then generated DFAs using subset construction.
- Produced visual state diagrams with Graphviz for education and debugging.

github.com/abdokin/automate-visualization

Minesweeper Game Engine

C, Raylib

- Implemented classic Minesweeper with flood-fill tile revelation and manual memory management.

EDUCATION

University Hassan II Casablanca

Casablanca, Morocco

2020 - 2024

Bachelor of Science in Computer Science - Decision Systems

Core: Data Structures & Algorithms, Database Systems, Software Engineering, Operating Systems, Formal Languages & Automata, Computer Architecture, Statistics, and Web Development

ADDITIONAL INFORMATION

Languages

Arabic: Native

English: Professional working proficiency

French: Conversational / Intermediate

Interests

Systems programming, compiler design, open-source contribution, performance tuning, and cloud architecture
